Index of Subjects

Aeromonas hydrophila in livestock: incidence, biochemical characteristics and antibiotic susceptibility, 365
Aeromonas hydrophila, methods for the isolation of, and *Plesiomonas shigelloides* from faeces, 145
Antibiotic sensitivity of enteropathogenic bacteria isolated from patients in a Sharjah hospital, 205
Avian tuberculosis in pigs: miliary lesions in bacon pigs, 129

Bactericidins, mechanisms of resistance of staphylococci grown in plasma to polymorph, 183
Bacteroides, the pathogenic properties of *Fusobacterium* and, species from wallabies and other sources, 165
Brucella abortus, the use of the microagglutination technique to determine the antibody status of healthy New Zealanders to, 401

Calves, the effect of maternally derived antibodies on the response of, to vaccination against foot and mouth disease, 105
Campylobacter jejuni, a study of the spread of, in four large kitchens, 357
Campylobacter jejuni, growth and survival characteristics of, in liquid egg, 53
Campylobacters, the use of Preston enrichment broth for the isolation of 'thermophilic', from water, 45
Chickens, development of the normal gastrointestinal microflora of specific pathogen-free, 79
Chickens, factors influencing salmonella shedding in broiler, 385
Chickens, the distribution of specific phage types of *Salmonella typhimurium* in, in Australia, 177
Cord sera, antibody against viruses in maternal and: non-specific inhibitors are found to higher titre on the maternal side of the circulation, 297
Corynebacterium ulcerans in humans and cattle in North Devon, 161
Cytomegalovirus, intra-uterine transmission of, in women known to be immune before conception, 89

Diphtheria, population studies of, immunity using antitoxin radioimmunoassay, 1
Disinfectants, evaluation of, in the domestic environment under 'in use' conditions, 193
Disinfection, an extended model for transfer of micro-organisms via the hands: differences between organisms and the effect of alcohol, 345
Domestic environment, evaluation of disinfectants in the, under 'in use' conditions, 193
Drug resistance, transferable plasmid-mediated, among non-O1 *Vibrio cholerae* and rough strains of *Vibrio cholerae* from Tamilnadu, India, 59

Egg, growth and survival characteristics of *Campylobacter jejuni* in liquid, 53
Enteropathogenic bacteria, antibiotic sensitivity of, isolated from patients in a Sharjah hospital, 205
Enteroviruses, reduction of naturally occurring, by wastewater treatment processes, 97
Escherichia coli, distribution of multilocus genotypes of, within and between host families, 377

Food, the microbiology of selected retail, products with an evaluation of viable counting methods, 67
Foot and mouth disease, the effect of maternally derived antibodies on the response of calves to vaccination against, 105
Fusobacterium, the pathogenic properties of, and *Bacteroides* species from wallabies and other sources, 165

Gastroenteritis, molecular epidemiology of human rotaviruses. Analysis of outbreaks of acute, in Glasgow and the west of Scotland 1981/82 and 1982/83, 209
Gastrointestinal microflora, development of the normal, of specific pathogen-free chickens, 79

Hands, an extended model for transfer of micro-organisms via the: differences between organisms and the effect of alcohol disinfection, 345
Hepatitis A, Nursery-associated, traced to a male nurse, 251

Immunoglobulin M, the, response to rubella vaccine in young adult women, 277
Influenza, age and secular distributions of virus-proven, patients in successive epidemics 1961–1976 in Cirencester: Epidemiological significance discussed, 303
Influenza, a one-year study of trivalent, vaccines in primed and unprimed volunteers: immunogenicity, clinical reactions and protection, 263
Influenza, human sera possess a limited antibody repertoire to, neuraminidase antigenic variants selected *in vitro*, 243
Influenza A, an investigation of antigenic drift of neuraminidases of, (H1N1) viruses, 223
Influenza A: infection and reinfection, 125
Influenza A, serological evaluation of an, virus cold-adapted reassortant live vaccine CR-37 (H1N1), in Japanese adult volunteers, 231
Intra-uterine transmission of cytomegalovirus in women known to be immune before conception, 89

Kitchens, a study of the spread of *Campylobacter jejuni* in four large, 357

Legionella spp., a prevalence study of antibodies to, in geriatric institutions, 37

Maternal sera, antibody against viruses in, and cord sera: non-specific inhibitors are found to higher titre on the maternal side of the circulation, 297
Mycoplasma pulmonis, enhancement of experimental, infection of the mouse genital tract by progesterone treatment, 139
Myxomatosis, the development of genetic resistance to, in wild rabbits in Britain, 255

Neuraminidase, human sera possess a limited antibody repertoire to influenza, antigenic variants selected *in vitro*, 243
Neuraminidases, an investigation of antigenic drift of, of influenza A (H1N1) viruses, 223
Non-specific inhibitors, antibody against viruses in maternal and cord sera: are found to higher titre on the maternal side of the circulation, 297

Pathogen-free, development of the normal gastrointestinal microflora of specific, chickens, 79
Pertussis, distribution of immunity to, in the population of England and Wales, 21
Pigs, avian tuberculosis in: miliary lesions in bacon pigs, 129
Plesiomonas shigelloides, methods for the isolation of *Aeromonas hydrophila* and, from faeces, 145
Preston enrichment broth, the use of, for the isolation of 'thermophilic' campylobacters from water, 45
Progesterone, enhancement of experimental *Mycoplasma pulmonis* infection of the mouse genital tract by, treatment, 139
Psittacosis, an outbreak of, in a boys' boarding school, 337
Psittacosis/ornithosis in Cambridgeshire 1975–1983, 9

Rabbits, the development of genetic resistance to myxomatosis in wild, in Britain, 255
Resistance, mechanisms of, of staphylococci grown in plasma to polymorph bactericidins, 183
Rinderpest, the duration of immunity in cattle following inoculation of, cell culture vaccine, 285
Rotaviruses, molecular epidemiology of human. Analysis of outbreaks of acute gastroenteritis in Glasgow and the west of Scotland 1981/82 and 1982/83, 209
R plasmids conferring multiple drug resistance from shigella isolated in Korea, 153
Rubella, a micro immune haemolysis test for, antibody screening, 117
Rubella, the immunoglobulin M response to, vaccine in young adult women, 277

Salmonella, factors influencing, shedding in broiler chickens, 385
Salmonella serotypes isolated from man in Malaysia over the 10-year period 1973–1982, 395
Salmonella typhimurium, the distribution of specific phage types of, in chickens in Australia, 177

Shigella, R plasmids conferring multiple drug resistance from, isolated in Korea, 153
Staphylococci, mechanisms of resistance of, grown in plasma to polymorph bactericidins, 183

Vaccine, serological evaluation of an influenza A virus cold-adapted reassortant live, CR-37 (H1N1), in Japanese adult volunteers, 231
Vaccine, the duration of immunity in cattle following inoculation of rinderpest cell culture, 285
Vaccine, the immunoglobulin M response to rubella, in young women, 277
Vaccine, a one-year study of trivalent influenza, in primed and unprimed volunteers: immunogenicity, clinical reactions and protection, 263
Viable counting methods, the microbiology of selected retail food products with an evaluation of, 67
Vibrio cholerae, transferable plasmid-mediated drug resistance among non-O1, and rough strains of *Vibrio cholerae* from Tamilnadu, India, 59

Wastewater, reduction of naturally occurring enteroviruses by, treatment processes, 97
Water, the use of Preston enrichment broth for the isolation of 'thermophilic' campylobacters from, 45

THE JOURNAL OF HYGIENE
